NEW

COMBO WASHER & DRYER

Integrate washing and drying program in one machine!

Designed for self-service laundry, offering short waiting times, outstanding results, and easy-to-use machines.

Experience business growth with low running costs, easy customer experience and fast customer turnover!

Touchless panel to response to growing concerns about hygiene.

The program switch responds simply by requiring only finger close to the switch without direct contact, enabling contactless operation. The panel, along with additional features such as clothing sterilization and temperature-repellant lamps, ensures users feel assured about the cleanliness of both their equipment and laundry.

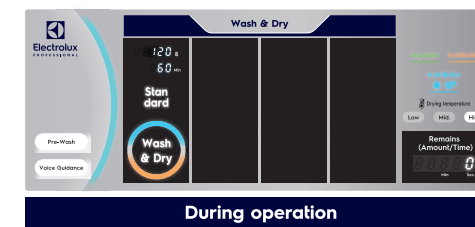

All programs are displayed.

When selecting a course

All options other than the program selected fade when the user holds their hand up to the panel.

During operation

Only the selected course is displayed.

Changes drying temperature to suit the garment

Temperature settings can be changed based on laundry labels for delicate and other garments.

3-Level temperature control

| Setting | Temperature |
|---------|-------------|
| Low. | 50°C |
| Med. | 60°C |
| High. | 70°C |

Customizable antiviral handles

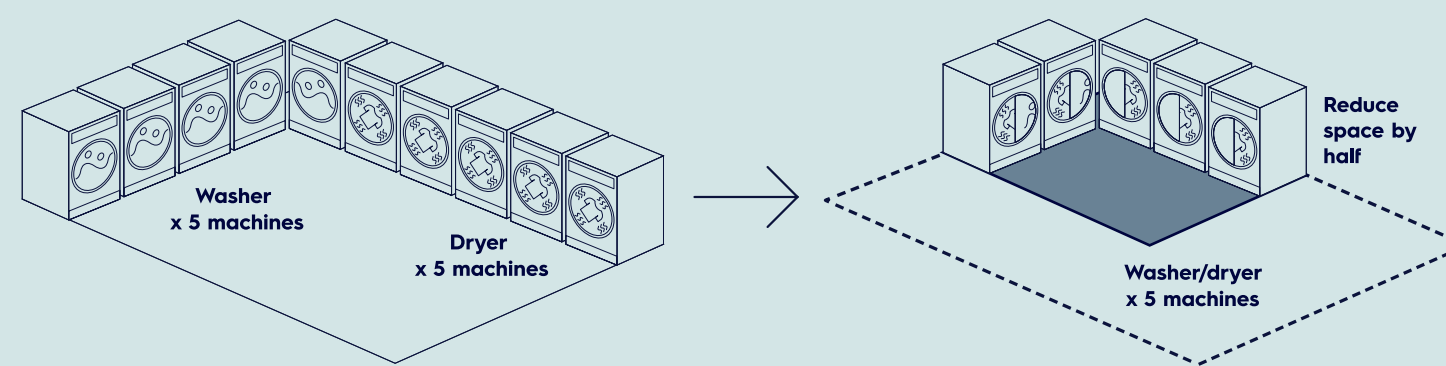

(Example)

Equipment door handles can be customized to help you differentiate your store and increase their appeal. The handles have been treated to repel viruses and improve hygiene, enabling users to feel comfortable using the machines.

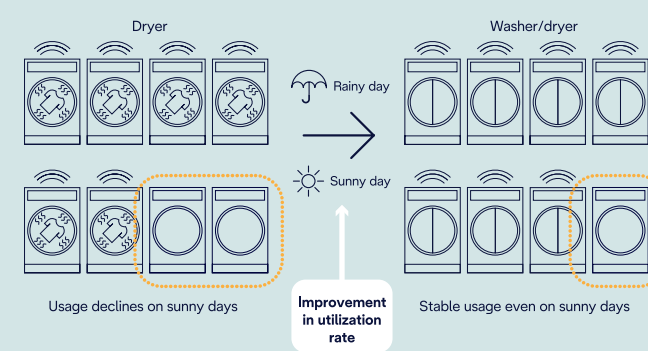

The New Combo Washer & Dryer: Maximize your profits with our space-saving, convenience and high-efficiency laundry solution!

Integrating a washer and dryer into a single unit ensures stable sales regardless of weather conditions. By combining both washing and drying functions, this innovative machine optimizes space usage and significantly enhances utilization rates, providing a comprehensive solution at one go.

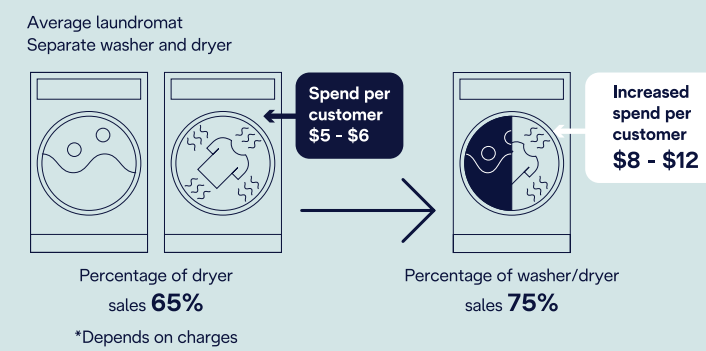

Both washing & drying program in one machine to achieve space-saving:

Improve utilization rate regardless sunny or rainy days:

Save space and higher spend per customer:

Inhibits mold and keeps machine clean

The new Combo Washer & Dryer have been designed to dry the inside of the Drum at a high temperature during the final "drying" cycle which is effective in controlling mold inhibiting bacteria. Tests have demonstrated that the level of mold and bacteria in a Combo Washer & Dryer used for approximately 4 years is "1".
